Configure Google Android to join UALR-WiFi
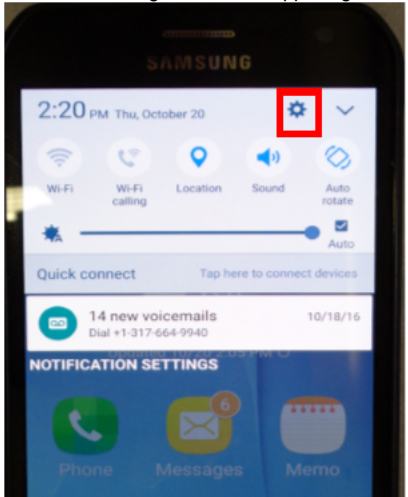

Follow these instructions to configure Google Android to join the UALR-WiFi network. If these instructions do not work, try the alternative instructions for Google Android.
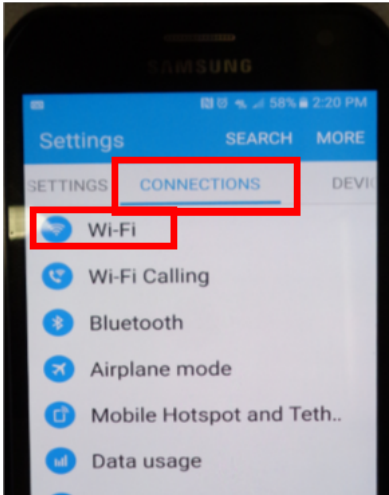

Step-by-step guide

1. Swipe down to access Settings on your phone

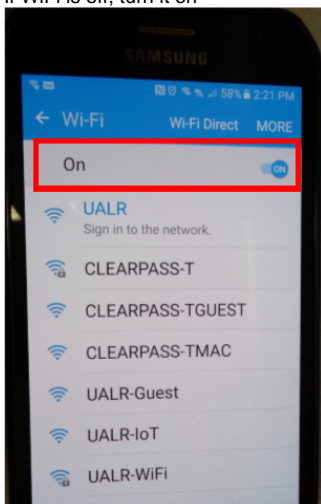

2. Select the Settings icon in the upper-right corner of the screen. The icon looks like a flower

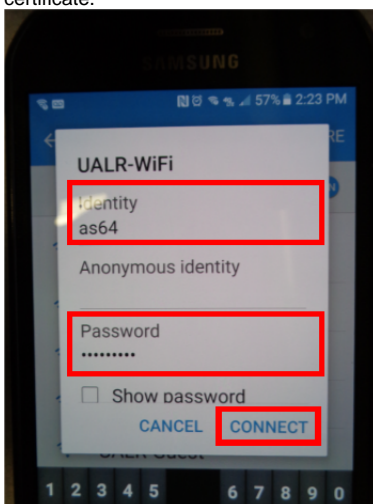

3. Select Connections, then WiFi

4. If WiFi is off, turn it on

5. Enter your NetID and Password, then select Connect. You may need to accept a certificate to proceed. If you receive this request accept the certificate.

6. After authentication, you will be added to the UALR-WiFi network. If this does not work, try the Alternative UALR-WiFi setup for Android Phone.
